Survey of Coastal and Marine Resources (COAS 2025)
Semester Experience on the Coast
Spring 2020 – Outer Banks Campus

Course Description: Gain understanding of coastal and marine systems and resources, tools to assess impacts of hazards and innovative approaches to manage risky coastlines

Course Highlights:
1. Learn about the latest tools for estimating coastal hazards and risk
2. Fundamental natural and human coastal processes
3. Coastal & marine resources, uses and conflicts
4. Evaluate innovative responses like ecosystem-based adaptation
5. Field trip to assess coastal problems and design adaptation strategies
