Dr. Jacob Petersen-Perlman is recruiting graduate students to join the Water Governance Lab at East Carolina University in Greenville, NC, USA. Students will join researchers at the Water Resources Center and the Department of Geography, Planning, and Environment in examining issues of water governance, management, and policy in North Carolina and beyond. Students may participate in projects involving transboundary water cooperation and decision-making at multiple scales, transboundary water politics, flood management and governance after extreme events (such as floods) and the food-water-energy-climate nexus.

**Desired Qualifications:** Students with backgrounds (Bachelor’s or Master’s) in social sciences (including Geography, Political Science, and others) and GIS analysis are encouraged to apply. For the Ph.D. position, a Master’s or previous graduate degree is preferred. Applicants from diverse backgrounds and/or previous life experiences in a natural resources field are encouraged to apply.

Geography MS Priority Deadline is **February 15th** (domestic students) or **April 1st** (international students). Integrated Coastal Sciences Ph.D. Priority deadline is **March 1st** (domestic and international students).

Funding is available for one MS student (Geography) and one Ph.D. student (Integrated Coastal Sciences) to join our research team beginning in Fall 2020. The research assistantship will provide in-state tuition and a stipend for two years. Please contact Jacob Petersen-Perlman at petersenperlmanj19@ecu.edu if you are interested.
